## **SABO to increase its capacity for Hindered Amine Light Stabilizers and related intermediates**

**Bergamo, Italy – 17 October, 2017** – SABO is implementing a major capacity expansion for Hindered Amine Light Stabilizers SABO®STAB UV 70 and SABO®STAB UV 91, and related intermediates. The expansion is scheduled to come on-stream during Q3 2018.

Additionally, SABO will increase the capacity of SABO®STAB UV 62 in 2019. Both investments represent a further significant commitment to our customers addressing their needs for reliable supply. The expansion is being driven by the increasing demand for Hindered Amine Light Stabilizers and advanced stabilization solutions in applications such as automotive parts, tapes, film and packaging materials.

Please visit us at Fakuma, Hall FW booth 134 in Friedrichshafen, Germany from October 17-21.

### **About SABO S.p.A.**

SABO is a privately-owned specialty chemicals company with a leading position in the development and manufacturing of light stabilizers for polymers.

SABO operates from its headquarter in Italy and from SABO International SA, Basel and Houston.
